

stainless innovation awards 2007

Stainless Steel, brings to mind great sophistication, strength and versatility. These are qualities that are also a part of the organisation that has been producing and promoting its use for several decades now, Jindal Stainless. To spread the passion we feel for this inspiring material and its fascinating aesthetic ability, we instituted the Stainless Innovation Awards.

Stainless Steel has the continuing commitment and fascination of architects and designers due to the outstanding design opportunities and creative inspiration offered by it. It blends exceedingly well with a wide range of other material, and can generate landscapes and lifestyle products allowing new levels of expression and technical sophistication.

The Stainless Innovation Awards aims to support, and provide a platform for new talent, to recognise innovation, and elevate the level of thought and application of this material.

Creative ideas of application of Stainless Steel in Interior Design

Bobby Mukherji

Place Mumbai

Application Details Sculpture Vase

This Sculptural Vase is a part of the interiors done for Hotel Le Meridian, Delhi. It is made of 304 grade Stainless Steel cut tubes, welded together with polycarbonate tubes placed inside to elevate the level for planters. The

polycarbonate tubes glow when lit from inside and add beauty to the vase. As a stainless steel structure this vase stands at a height of 5 feet and with polycarbonate tubes and planters it goes upto 7 feet.

Kalhan Mattoo

Place Mumbai

Application Details Brushed stainless steel skin laminate - Carapace

It is a polymorphic construct called 'Carapace'. It is an undulating wall that runs the entire diagonal length of the restaurant connecting visually the open kitchen and the front glass façade and providing a backdrop for the table setting. The wall turns and warps to become the canopy for the open

kitchen in the plan. Constructed out of plywood clad in high quality brushed stainless steel skin laminate, it reflects and disperses light in a fascinating way. Patrons visiting this eatery for the first time are struck by the visual impact of the element it surprises, intrigues, and fascinates in the order!
